YOUR health

OZONE THERAPIES

- Major Autohemotherapy - removing blood, adding ozone to it, then returning it to you. Consider for acute infection, cancer, autoimmune disease, all chronic diseases
- Prolozone Therapy®: for painful areas
- Sinus insufflation: for sinus congestion, pressure, chronic sinusitis
- Ear insufflation: for ear pressure, tinnitus
- Topical Ozone – Hyperozoneated olive oil for all skin conditions
- Rectal Insufflation - infusing ozone rectally, absorbed 98% systemically (full body effect)
- Limb Bagging - a topical ozone application for infections, toe fungus, leg wounds

PROLOZONE THERAPY®

INJECTIONS FOR ACUTE & CHRONIC PAIN

A safe, natural and often permanent treatment for pain: knees, hips, rotator cuff tears, arthritis, trigger point pain, back and neck pain

HOW DOES IT HELP?

Prolozone Therapy® involves injecting an anti-inflammatory solution with vitamins to nourish the cells in the damaged area followed by ozone gas which stimulates repair, strengthens injured tissues and assists in healing to resolve your pain.

OZONE BENEFITS

Ozone treats the cause of your symptoms and repairs all the vital links of health. At a cellular level ozone clears hidden infections, corrects metabolism and supports biological systems to improve health.

WHAT OZONE CAN DO FOR YOU

- Ozone modulates the immune system so that it functions as it was designed to function.
- Ozone increases oxygen delivery to the tissues and cells.
- Ozone kills bacteria and viruses on contact, and it inhibits the ability of viruses to attach to cells.
- Ozone increases cellular energy, making energy production more efficient and cells function normal.
- Ozone increases antioxidant protection and decreases the level of oxidation (free radicals) in your body better than any other therapy
- Ozone is a powerful mitochondria stimulant. The fundamental underlying cause behind all degenerative disease from diabetes to heart disease to cancer is decreased mitochondrial energy production
