HOW IT WORKS

When cells are stressed, nitric oxide (NO) inhibits oxygen consumption by mitochondrial cytochrome-c-oxidase. This reduces production of ATP (energy) and causes oxidative stress leading to increased inflammation. THORLaser displaces NO from cytochrome-c-oxidase thereby reducing inflammation and restoring ATP production, helping tissues heal more quickly.

THOR MEDICAL

With over 3,000 customers using THOR lasers in 70 countries including Harvard Medical School, NASA researchers, US Navy, RAF, British Army, Royal Navy, NHS, BUPA, premier division of football teams, British Lion Rugby, THOR can rightly claim to be the number one supplier in the world of LLLT technology and training.
